Introducing the Blackink IT Risk Review

Exclusively for Indiana Life Sciences Members

What is the Blackink IT Risk Review?

The Blackink IT Risk Review is a service designed to help organizations identify and assess the risks present in their technology operations. Participants will be guided by experienced IT executive who will give expert insights tailored to your organization.

Key Features:

- **Service Cost:** Cost covered for members of the Indiana Life Sciences Association.
- **Expert Guidance:** Led by an experienced IT executive.
- **Broad Overview:** A one-hour meeting covering the 15 critical questions and your responses.
- **Data Security Focus:** Identify where your data is stored, how it is protected, and your recovery capabilities.
- **General IT Insights:** Gain a broader understanding of your IT operations and potential risks.

What to Expect:

1. **Risk Review:** Answer 15 targeted questions to help us understand your data storage, protection measures, and recovery processes.
2. **Consultation:** Schedule a one-hour meeting with a Blackink IT expert to discuss your organization's risks as observed based on the review response and our recommendation on your organization's next steps.
3. **Examples of Actionable Next Steps:** Cybersecurity framework review and adoption, an IT policy review and development project, consultation on part 11 compliance prep, AI readiness exercise, or an incident response table-top exercise.

Ready to Get Started?

Email info@blackinkit.com, and a member of the Blackink IT team will reach out to schedule your Risk Review. We look forward to getting to know your organization and collaborating to mitigate any risk that is found.
